Title

Title of the Thesis Proposal

Abstract

Background of Research:
Briefly describe the background of the research.
Objective of Research:
State the main objective(s) of the research.
Methods:
Outline the methods to be used in the study.
Expected Results:
Summarize the expected findings or contributions of the study.

1 Introduction

- **Background:** Provide context and background for the research topic.

- **State of the Art:** Review the current state of the art in the relevant field.

- **Gap Analysis:** Identify gaps in existing research.

- **Research Question:** Clearly state the research question(s).

- **Research Objective:** Define the objectives of the study.

- **Limitation:** Describe the scope and limitations of the research.

- **Hypothesis:** State the research hypothesis.

2 Literature Review

Discuss a minimum of 20 citations related to the research topic. Compare existing methods, models, and approaches. Identify research gaps and justify the proposed work.

3 Methodology

- **Research Design:** Outline the overall design of the study.

- **Data Collection:** Describe the data sources and collection methods.

- **Data Preprocessing:** Explain data cleaning and preprocessing techniques.

- **Data Processing:** Discuss data processing steps and tools.

- **Data Analysis:** Specify data analysis techniques.

- **Data Visualization:** Outline data visualization methods.

- **Data Validity:** Discuss validity and reliability considerations.
